

Securing A Cloud Environment

Hardware Firewalls on IBM Cloud

Securing a Cloud Environment

Hardware Firewalls on IBM Cloud

Product Features

A hardware firewall in your cloud infrastructure can be a cheap and easy way to meet your security requirements and protect your environment.

By adding a hardware firewall you can remove the overhead of processing firewall rules on to a device tailored for those needs. With a dedicated firewall you can easily manage firewall rules for multiple servers with standard configurations for your entire environment.

Hardware Firewall	Hardware Firewall (Dedicated)
<ul style="list-style-type: none">• 10Mbps-2,000Mbps Single Server Protection• Anytime Speed Upgrades• Instant Provisioning• Full SoftLayer API Support	<ul style="list-style-type: none">• Redundant 1Gbps Connectivity• Full VLAN Protection for Single or Multiple Servers• Instant Provisioning• Full SoftLayer API Support
Hardware Firewall (High Availability)	Fortigate Security Appliance
<ul style="list-style-type: none">• Active-Passive High Availability• Full VLAN Protection for Single or Multiple Servers• Instant Provisioning• Full SoftLayer API Support	<ul style="list-style-type: none">• Redundant 1Gbps Connectivity• High Availability Option• SSL and IPsec VPN Termination• NAT Support• Inbound and Outbound Rules

SoftLayer Portal and API Support:

Not everyone has a full time system administrator available for managing their network. With SoftLayer's Portal and API supported firewalls our easy to use GUI provide you with everything you need to get started

Growing with you:

Firewalls are never a one size fits all configuration. With our range of offerings for SMB to Enterprise we can find the right fit for your needs

High Availability:

Select Firewalls provide a ready-to-go active-passive configuration allowing seamless transitions and an extra peace of mind

Intrusion Prevention System:

IPS available with Fortigate add-ons

Still not sure which firewall is right for you? Our sales team is always available to help you determine which product will fit your needs best. Visit <http://www.softlayer.com/firewalls> to learn more about these options and contact us.

As with all SoftLayer products, your firewalls are backed by our 24/7/365 technical support team who will assist you with configuration and troubleshooting.
